April 2018 -- Featured Manufacturer

M&M Distributes the Finest Names in the Industry!

What is the color of success? SPENCE!

The Spence Engineering Company is a widely recognized leader in the steam regulator and flow control field, and its success is driven by its excellence. Success is not a destination; it's a journey, composed of leadership, excellence, and workmanship.

Regulators. Relief valves. Control valves. Direct operated valves. These are some of the products Spence offers. Take a tour through our Web site for more product information at www.mmcontrol.com/spenceengineeringcompany.php. You'll be glad you did.

Paulsen Spence developed the original patent for the normally closed external pilot operated packless pressure regulator. This design is the basis for the products offered today.

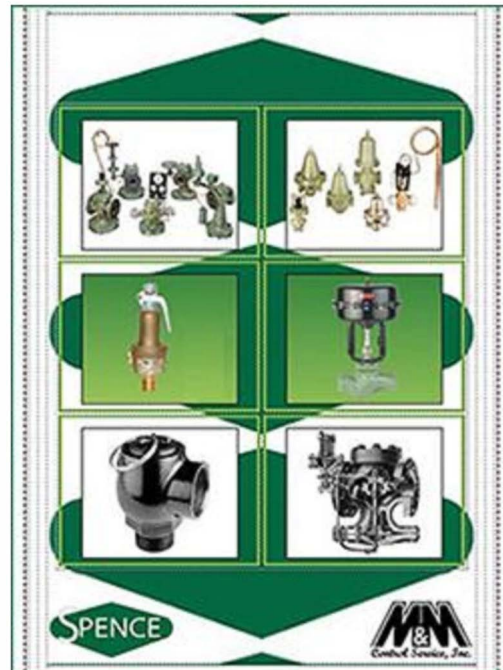

Spence's principal valve, the E Main, meets the requirements of a large majority of regulator installations as it can be controlled by various types of interchangeable pilots. The company's broad range of Safety Relief Valves meet ASME Boiler and Pressure Vessel code requirements. Control Valves are offered in a diverse selection of control valves for a wide range of applications. Spence also offers Direct Operated Valves for both pressure and temperature applications.

M&M Control is a stocking distributor for Spence Engineering Company. For more product information or for help with your application, call us at **1-800-876-0036** for assistance!

M&M is Proud to Represent Spence Engineering Company! Contact our sales professionals for assistance today at 1-800-876-0036 or visit our Web site at www.mmcontrol.com to see our other fine lines as well.

Thank you! All of us at M&M look forward to hearing from you.

Sincerely,
Paul Fionda
VP Operations
