Pyromation makes precise, highly accurate temperature sensing devices and equipment for industrial and commercial applications.

Pyromation is "beyond measure" with temperature measurement in its production process. If you require a temperature measurement device for your application, Pyromation makes the one you need. Some of Pyromation's temperature measurement devices include sensors used in the medical industry, heavy-duty industrial thermocouples with protection tubes, bearing sensors for wind turbines, and quick-response RTDs for the dairy industry.

Pyromation's **Thermocouples** are the most common, convenient, and versatile devices used to measure temperature. They convert units of heat into useable engineering units that serve as input signals for process controllers and recorders. The company offers a wide range of thermocouples for most market applications, including MgO, industrial, and general-purpose.

RTD's: Resistance temperature detectors accurately sense process temperatures with an excellent degree of repeatability and interchangeability of elements. Also known as resistance thermometers, the RTD is composed of certain metallic elements whose change in resistance is a function of temperature. Pyromation manufactures resistance temperature detectors and resistance thermometers for many industry applications, and has the right RTD type for your job.

M&M Control offers a full line of Pyromation products. For additional product such as thermowells, transmitters, and accessories, or for help with your application, call us today at **800-876-0036**.

M & M Control Service, Inc. is a leading distributor of pneumatic, electronic, and self-contained valves, controls, and process control equipment. Our commitment to quality products and exceptional customer service is renowned in the industry. Our sales engineers are factory trained to provide you with sizing, application, configuration, or installation assistance.

**FACTORY DIRECT PRICING!
PRODUCTS INCLUDE:**

Valves:

Gate, ball, butterfly, gas valves, solenoid, control, needle, water, steam, instrument, automatic, thermostatic, pneumatic, electronic, mixing, check, and relief valves.

Gauges:

Pressure gauges, utility gauges, process, industrial, commercial & contractor gauges, HVAC/R, and specialty gauges.

Controls & Controllers:

Pneumatic / electronic HVAC, process, combustion, PID, recorders (strip/circular/paperless), and indicators.

- Calibrators
 - Flow Meters
 - Regulators
 - RTDs
 - Transducers
 - Sensors
 - Steam Traps
 - Strainers
 - Thermocouples
 - Thermometers
 - Transmitters
