

Control Service, Inc.

Mueller Steam Specialty began as a small specialty manufacturer servicing the valve industry, and incorporated in 1956 to start manufacturing pipeline strainers. Today, in addition to a full range of pipeline and specialty strainers, the company manufactures a broad offering of check valves and butterfly valves.

[Y Strainers](#)

[Basket Strainers](#)

[Turbine Meter Strainers](#)

[Tee Strainers](#)

Mueller Strainers are used to strain foreign matter from connected pipeline systems and provide protection for pumps, meters, valves, and other costly mechanical equipment. **Y Strainers** remove solids from flowing steam, gases, or liquid piping systems. **Tee Strainers** remove foreign particles from pipelines. **Turbine Meter Strainers** protect fluid monitoring devices such as displacement water meters.

Basket strainers are used in applications that require a strainer with an extremely large capacity. Types include **simplex basket strainers** such as model 125-SS used for chemical processes including brine, paint, fuel oil, organic and inorganic chemicals, condensers, heat exchangers, and similar applications. **Duplex basket strainers** are for continuous flow applications where the process cannot be shut down for cleaning.

[Butterfly Valves](#)

[Check Valves](#) [Shown: Sure, Chexter, & Silent Checks](#)

Butterfly Valves are designed for a variety of general applications for controlling liquids, gases, and slurries. Wafer and lug butterfly valves are offered in a range of sizes, performance ratings, and actuation options.

Mueller offers a variety of **Check Valves** such as series 71 Class 125 cast iron **SURE CHECK™** valves that are designed for liquids and gases where flow reversal can cause surge and water hammer. Elastomer seats provide bubble-tight shutoff.

M&M Control offers a full line of Mueller products. Call us for help with your application!
